

# Installation Guide

## INSTRUCTIONS

### Step 1: Locate careerbot Folder

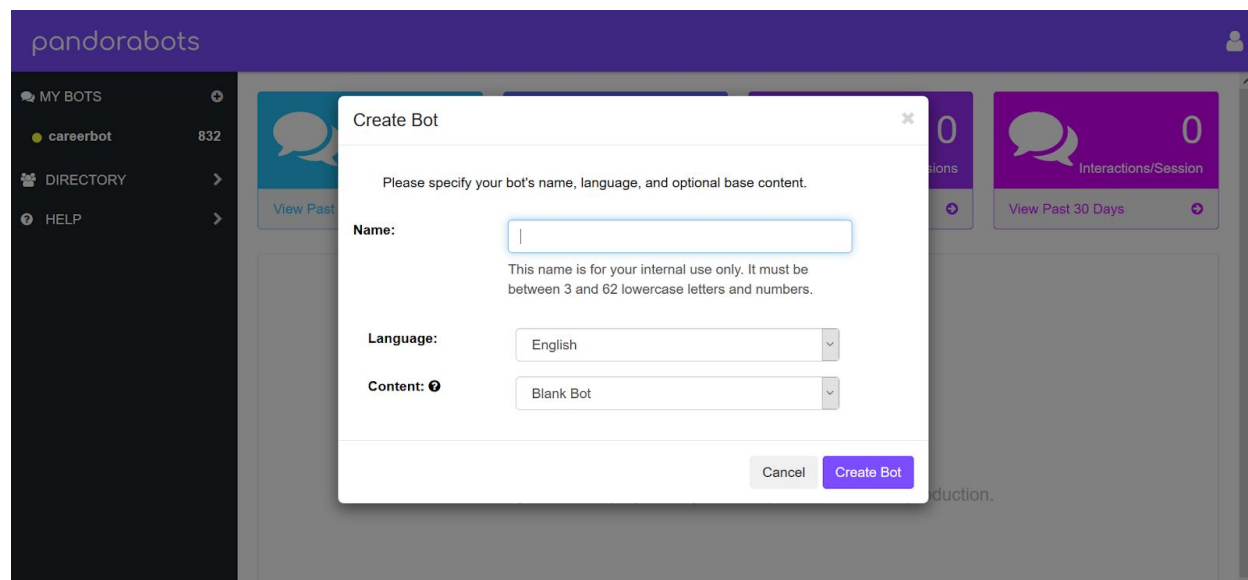

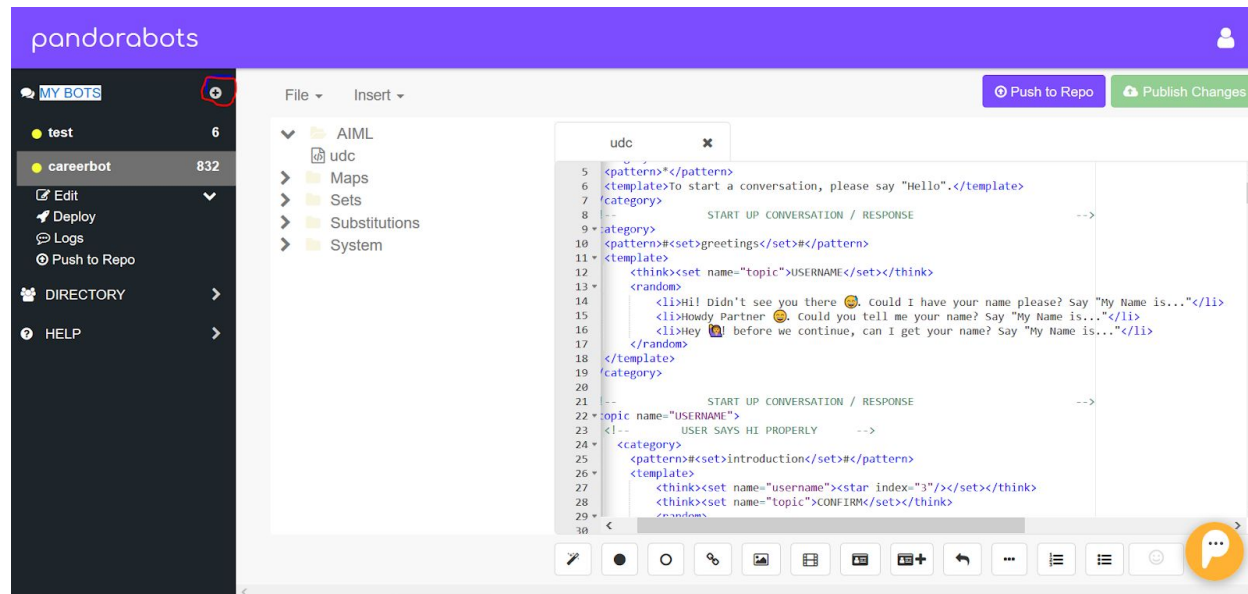

Within this file, is all the files you will need to install the chatbot AI.

### Step 2: Create a Pandorabots Account

[www.pandorabots.com](http://www.pandorabots.com)

### Step 3: Create a New Bot

Click the + button next to my bots and go through the setup process for creating a new bot. You will be prompted to give it a name. Once you give it a proper name, click the “create bot”.

**Step 3: Create a New Bot**

Click the + button next to my bots and go through the setup process for creating a new bot. You will be prompted to give it a name. Once you give it a proper name, click the “create bot”.

**Step 4: Upload careerbot Files**

After you create a new bot, click on its name. A drop down menu should appear, then click the edit option, and then the code editor option. You will then be taken to a new screen, find file and then click it. A drop down menu for file should appear, click the “Upload” option. When you do, you will be prompted with a menu, click “Select Files” and find where the careerbot folder is and open it. Select all the files within that folder. Then, click the upload button on the menu. You might be warned that some of your files will overwrite existing files, upload all the files anyways.

**Step 5: Click the Yellow Button and Begin**

After that, click the yellow button on the bottom right of the pandorabots site and a chat should open. Say hello to the chatbot and begin the process. Enjoy!
